SKILLS

Programming Languages:	Java, HTML, CSS, SQL.
Concepts:	Data Structures & Algorithms, Full stack development.
Design Tools:	Adobe Photoshop, Illustrator, Lightroom, Filmora.
Soft Skills:	Client-Focused Communication, Proactive Self-Learner, Detail-Oriented Analysis.

EXPERIENCE

Freelance Graphic Designer (Remote) 2020 – Present

- Collaborated with clients through detailed consultations to understand requirements and deliver customized digital design solutions.
- Designed and delivered 600+ creative projects including posters, logos, and calligraphy artworks, enhancing brand visibility and maintaining strong client satisfaction.
- Self-learned industry-standard design tools and continuously adapted to evolving client requirements, demonstrating strong creativity, problem-solving, time management, and independent learning abilities through 6+ years of freelance experience.

PROJECTS

1. Farmer Information Portal – Agriculture Support Website

Support System for Farmers

- Developed a **full-stack web application** using **HTML, CSS, Figma, PHP, and MySQL** to provide centralized access to crop information and government schemes.
- Designed the complete **UI in Figma** and implemented a clean, user-friendly frontend, utilizing strong visual design principles from prior graphic design experience.
- Built separate **User and Admin modules**, where users can view information and submit queries, while admins manage system data securely.
- Developed a secure **Admin Dashboard** using **PHP sessions** and implemented **CRUD operations** for managing crop and scheme records dynamically.
- Integrated a **Contact Us** feature to collect user queries and store them in the **MySQL database** for administrative review.

2. Multi-User Task Management System (Full-Stack Project)

Tech Stack: HTML, CSS, JavaScript, Node.js, Express, MySQL, Figma

- Developed a **multi-user task management system** with **user authentication**, personalized dashboards, and **category-based task organization**.
- Implemented **RESTful CRUD APIs** using **Node.js, Express.js, and MySQL** with **foreign keys, JOIN queries, and relational database design**.
- Built features like **task search, status/category filtering, task updates, and dynamic frontend interaction** using **vanilla JavaScript**.
- Designed a responsive **single-page dashboard UI** using **HTML, CSS, and JavaScript** without frontend frameworks.

3. Student Management System with Java

Console Based Academic Record & Marks Management System

- Developed a console-based management system using **Core Java** and **Object-Oriented Programming** concepts to manage student and teacher records.
- Implemented **authentication**, **CRUD operations**, **marks entry**, **marksheet generation**, and **result calculation** functionalities with structured menu-driven workflows.
- Applied **OOP** principles, **exception handling**, **arrays** of objects, **constructors**, **encapsulation** and **getter/setter methods** to build a structured academic project.
- Designed a **modular menu-driven architecture** with separate student and teacher functionalities to improve **code organization** and **maintainability**.

EDUCATION

Master of Computer Application, MIT World Peace University

Expected – 2026

Bachelor of Computer Application, Bharati Vidyapeeth University

2021 – 2024

CGPA: 7.86/10

CERTIFICATIONS

- Web Development Bootcamp – Udemy: HTML, CSS, JavaScript, and deployment tools.
- Data Structures and Algorithms – Infosys Springboard: Core problem-solving and logic building.
- AR/VR Acceleration Bootcamp – CDAC: Basics of immersive tech, created AR/VR prototypes.
- Barclays LifeSkills Programme – GTT: Time management, communication, workplace readiness.
- UI/UX with Figma – Udemy: Interface design using Figma

INTERESTS & HOBBIES

- Photography – Capturing story-rich nature and portraits.
- Graphic Design – Creating visually appealing digital content.
- Chess – Strategic thinking and decision-making enhancement.
